Art Unit: 1723

Claims 5 and 8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. "Etc." is considered to render the claims indefinite.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-11 are rejected under 35 U.S.C. 102(B) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Japan Patent No. 7-318,551 (including the translation supplied by the examiner in the office action of June 24, 2001). The claims are considered to read on Japan Patent No. 7-318,551. However, if a difference exists between the claims and Japan Patent No. 7-318,551, it would reside in optimizing the steps of Japan Patent No. 7-318,551. It would have been obvious to optimize the steps of Japan Patent No. 7-318,551 to enhance separation.

The restriction and election of species requirements have been reconsidered, deemed
